Area of a Parallelogram Worksheet

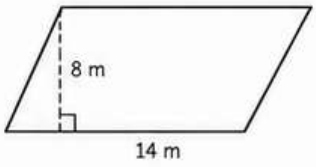

Name: _____ Class: _____ Date: _____

1. Find the area of the parallelogram.

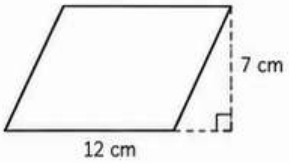

Area = _____

2. Find the area of the parallelogram.

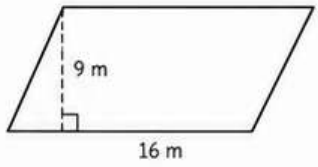

Area = _____

3. Find the area of the parallelogram.

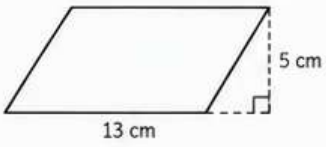

Area = _____

4. Find the area of the parallelogram.

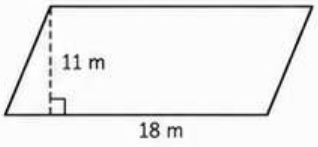

Area = _____

5. Find the area of the parallelogram.

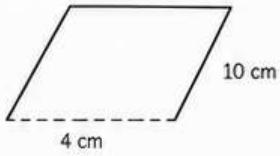

Area = _____

6. Find the area of the parallelogram.

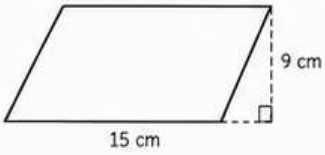

Area = _____

7. Find the area of the parallelogram.

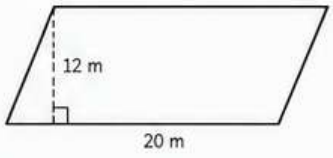

Area = _____

8. Find the area of the parallelogram.

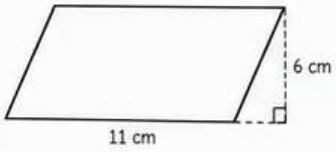

Area = _____

9. Find the area of the parallelogram.

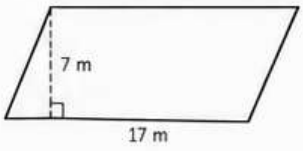

Area = _____

10. Find the area of the parallelogram.

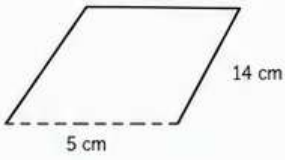

Area = _____

11. Find the area of the parallelogram.

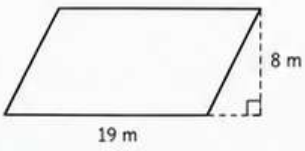

Area = _____

12. Find the area of the parallelogram.

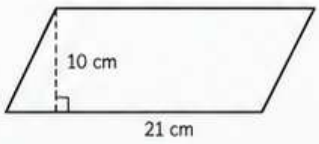

Area = _____

13. Find the area of the parallelogram.

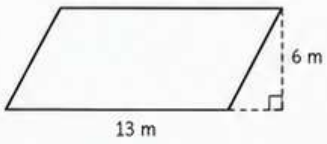

Area = _____

14. Find the area of the parallelogram.

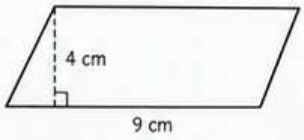

Area = _____

15. Find the area of the parallelogram.

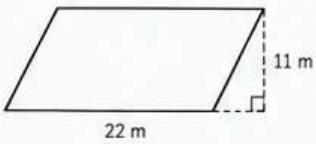

Area = _____

16. Find the area of the parallelogram.

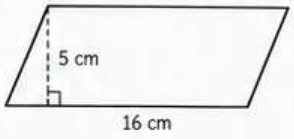

Area = _____

17. Find the area of the parallelogram.

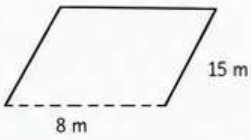

Area = _____

18. Find the area of the parallelogram.

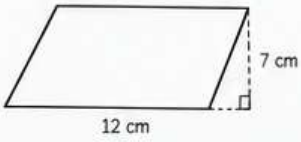

Area = _____

19. Find the area of the parallelogram.

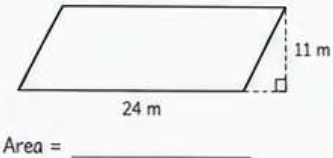

Area = _____

20. Find the area of the parallelogram.

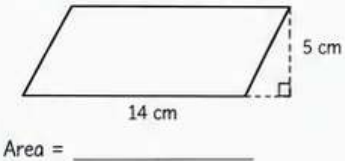

Area = _____

21. Find the area of the parallelogram.

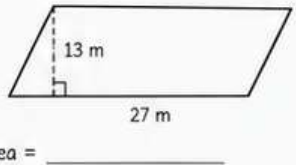

Area = _____

22. Find the area of the parallelogram.

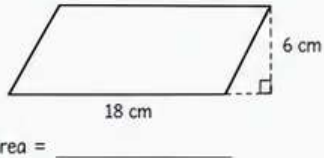

Area = _____

23. Find the area of the parallelogram.

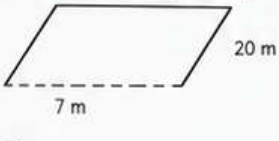

Area = _____

24. Find the area of the parallelogram.

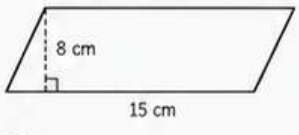

Area = _____

25. Find the area of the parallelogram.

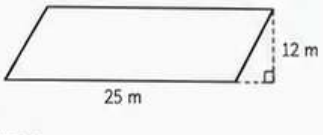

Area = _____

26. Find the area of the parallelogram.

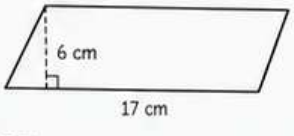

Area = _____

27. Find the area of the parallelogram.

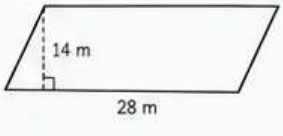

Area = _____

28. Find the area of the parallelogram.

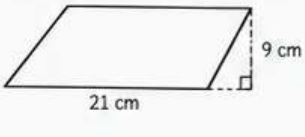

Area = _____

29. Find the area of the parallelogram.

Area = _____

30. Find the area of the parallelogram.

Area = _____

31. A parallelogram has a base of 16 cm and a height of 10 cm. What is its area?

Area = _____

32. A parallelogram has a base of 23 m and a height of 7 m. What is its area?

Area = _____
